

Covert base unit – flat-pack or flexible TRX inductors

Designed for following uses and industries

The covert base unit is a covert inductive system complete with wireless PTT for use with RCR1-6 wireless earpieces in a covert surveillance role.

TECHNICAL DATA

WEIGHT	150g
CABLE LENGTH CONNECTOR to transition module	radio specific
CABLE LENGTH TRANSITION MODULE to mic/ind Lemo connector	150mm
CABLE LENGTH TRX/LOOP mic/inductor to Lemo	150mm
CABLE LENGTH TRX/PACK mic/inductor to Lemo	300mm
CABLE LENGTH TRX/Flex mic/inductor to Lemo	300mm
CONNECTOR	Radio specific
COLOUR	Beige only

KEY BENEFITS

- A covert base unit comprising of a radio specific connector, wireless receiver module (with in-built PTT), wireless keyfob PTT and Lemo plug for attachment of TRX inductors
- A choice of inductive neckloop, flat-pack or flexible inductor available with built in microphone and Lemo connector to attach to covert base unit
- The covert car key PTT provides PTT and tones as standard – alternative programmable options available for some radios
