

CLARITY interference free wireless – FCC approved covert neck-loop/microphone system

The Clarity interference free wireless is an FCC approved covert neckloop/microphone system comprised of a radio specific connector, wireless receiver module with built-in PTT and a wireless key-fob PTT for use with the RCR7 wireless earpiece for covert surveillance missions.

Clarity provides clear and reliable communications when used near power lines and other sources of interference.

Designed for following uses and industries

TECHNICAL DATA

WEIGHT	140g
CABLE LENGTH CONNECTOR to transition module	radio specific
CABLE LENGTH TRANSITION MODULE to neckloop Mic/ind	300mm
CABLE LENGTH Mic/inductor Circumference	740mm
CONNECTOR	Radio specific
COLOUR	Beige only

KEY BENEFITS

- A covert system comprising of a radio specific connector, in-built PTT, wireless receiver module for keyfob PTT and neckloop system
- The covert car key PTT provides PTT and tones as standard – alternative programmable options available for some radios
- Uses RCR7 Clarity wireless earpiece (as RCR1-6 is incompatible)
